Any women who finds out that they are pregnant should stop taking this medication and inform their doctors. More serious side effects include fever, fatigue, dark colored urine, weight gain, infrequent urination, itchiness, clay colored stool, jaundice and blurred vision. <http://www.lipitoreasyorder.com/> - order atorvastatin Patients with high cholesterol are prescribed Lipitor so that the chance of them having a stroke or heart attack are lessened. Lipitor should be avoided by patients with thyroid disorders, as well as by those who have liver or kidney disease as well as by those who drink more than two alcoholic beverages per day.
